- The sculpture is firmly held in place by 28 x 12mm thick steel bolts. The steel pyramid structure is self-supporting and does not require the central metal pole in place to stand. The central pole is securely clamped in place by the steel frame at both the base and at a height of 2m. When dismantled the 4 segments that make up the bowl can be stacked on top of each other, as well as the 8 steel rods, centre pole, and holder.
